- c. Managers constantly mobilize for change.
- d. Managers lead and empower teams.
- e. Managers encourage conversation and collaboration.

ANSWER: b

142. Managers, in today's work environment, rely less on _____.

- a. coordination and communication and more on control and command leadership
- b. autocratic leadership and more on empowering leadership
- c. empowerment and innovation and more on productivity and efficiency leadership
- d. effectiveness and efficiency and more on quality and profit leadership
- e. ethics and social responsibility and more profit and cost-savings leadership

Ch 01: Leading Edge Management

ANSWER: b

143. Instead of being a controller, an effective manager who helps people do and be their best is a(n) _____.

- a. regulator
- b. enabler
- c. director
- d. facilitator
- e. mobilizer

ANSWER: b

144. Defining goals for future organizational performance is known as _____.

- a. organizing
- b. controlling
- c. leading
- d. planning
- e. coordinating

ANSWER: d

145. Assigning tasks, grouping tasks into departments, delegating authority, and allocating resources across the organization is known as _____.

- a. organizing
- b. controlling
- c. leading
- d. planning
- e. coordinating

ANSWER: a

146. The management function that involves the use of influence to motivate employees to achieve the organization's goals is referred to as _____.

- a. organizing
- b. controlling
- c. leading
- d. planning
- e. coordinating

ANSWER: c

147. Monitoring employees' activities, keeping the organization on track toward its goals, and making corrections as needed is the management function of _____.

- a. organizing
- b. controlling
- c. leading
- d. planning
- e. coordinating

ANSWER: b

Ch 01: Leading Edge Management

148. Conceptual skills are especially important for which of the following types of managers?

- a. First-level
- b. Middle
- c. Supervisory
- d. General
- e. Top

ANSWER: e

149. In which of the following roles do managers seek and receive information, scan periodicals and reports, and maintain personal contacts?

- a. Disseminator
- b. Spokesperson
- c. Monitor
- d. Decisional
- e. Interpersonal

ANSWER: c

150. In which of the following roles do managers initiate improvement projects, identify new ideas, and delegate idea responsibility to others?

- a. Disseminator
- b. Spokesperson
- c. Monitor
- d. Entrepreneur
- e. Interpersonal

ANSWER: d

151. Which of the following types of managers would be responsible for performing ceremonial and symbolic duties such as greeting visitors and signing legal documents?

- a. Disseminator
- b. Spokesperson
- c. Monitor
- d. Entrepreneur
- e. Figurehead

ANSWER: e

152. Which of the following roles involves scheduling, budgeting, and setting priorities?

- a. Disseminator
- b. Spokesperson
- c. Resource allocator
- d. Entrepreneur
- e. Figurehead

ANSWER: c

Ch 01: Leading Edge Management

153. In historical management perspectives, there has long been a struggle to balance _____.

- a. the humanity of production and the technology of production
- b. the quality of production and the things of production
- c. the things of production and the humanity of production
- d. the things of production and the technology of production
- e. the quality of production and the humanity of production

ANSWER: c

154. The nineteenth and early twentieth centuries saw the development of which management perspective?

- a. Human relations movement
- b. Behavioral sciences approach
- c. Classical perspective
- d. Quantitative management approach
- e. TQM approach

ANSWER: c

155. Which of the following perspectives emphasized a rational, scientific approach to the study of management and sought to make organizations efficient operating machines?

- a. Humanistic perspective
- b. Behavioral sciences approach
- c. Classical perspective
- d. TQM approach
- e. Quantitative management approach

ANSWER: c

156. Which of the following is a subfield of the classical management perspective that emphasized scientifically determined changes in management practices as the solution to improving labor productivity?

- a. Human relations movement
- b. Behavioral sciences approach
- c. TQM approach
- d. Quantitative management approach
- e. Scientific management movement

ANSWER: e

157. Frank Gilbreth stressed efficiency and was known for his quest for _____.

- a. the one best way to do work
- b. leadership flows from the top down
- c. procedures and policies
- d. scientific management
- e. bureaucracy

ANSWER: a

158. Time and motion studies that resulted in a drastic reduction in the time patients spent on the operating table were pioneered by _____.

Ch 01: Leading Edge Management

- a. Edward Deming
- b. Henry Gantt
- c. Max Weber
- d. Mary Parker Follett
- e. Frank Gilbreth

ANSWER: e

159. Who is considered the "first lady of management"?

- a. Mary Parker Follett
- b. Lillian Gilbreth
- c. Carly Fiorina
- d. Maxine Weber
- e. Anne Adams

ANSWER: b

160. The subfields of the classical perspective include _____.

- a. quantitative management, behavioral science, and administrative principles
- b. bureaucratic organizations, quantitative management, and the human relations movement
- c. administrative principles, bureaucratic organizations, scientific management, and management science
- d. scientific management, quantitative management, and administrative principles
- e. quantitative management, artificial intelligence, scientific management, and management science

ANSWER: c

161. Who is considered the "father of scientific management"?

- a. Frank B. Gilbreth
- b. Elton Mayo
- c. Henry Gantt
- d. Douglas McGregor
- e. Frederick W. Taylor

ANSWER: e

162. Which of the following is a bar graph that measures planned and completed work along each stage of production by time elapsed?

- a. Time and work chart
- b. Gantt chart
- c. Time and motion chart
- d. Production and delivery chart
- e. Gilbreth chart

ANSWER: b

163. Frederick Taylor's contributions were in the field of _____.

- a. scientific management
- b. human resource management

Ch 01: Leading Edge Management

- c. human relations
- d. quantitative management
- e. total quality management

ANSWER: a

164. Which of the following is NOT a criticism of scientific management?

- a. It does not appreciate the social context of work.
- b. It does not appreciate the higher needs of workers.
- c. It does not appreciate the careful study of tasks and jobs.
- d. It does not acknowledge variance among individuals.
- e. It tends to regard workers as uninformed and ignores their ideas and suggestions.

ANSWER: c

165. Standardization of work and wage incentives are characteristics of _____.

- a. bureaucratic organizations
- b. scientific management
- c. quantitative management
- d. administrative management
- e. behavioral science

ANSWER: b

166. Which of the following is a major criticism of scientific management?

- a. It ignored the social context of work.
- b. It ignored the impact of compensation on performance.
- c. It overemphasized individual differences.
- d. It overemphasized the intelligence of workers.
- e. It emphasized the social context of work.

ANSWER: a

167. The assembly line is most consistent with which of the following general principles of management?

- a. Unity of command
- b. Division of work
- c. Authority
- d. Scalar chain
- e. Quality management

ANSWER: b

168. The bureaucratic organizations approach is a subfield within _____.

- a. the classical perspective
- b. management science
- c. scientific management
- d. the learning organization
- e. the humanistic perspective

Ch 01: Leading Edge Management

ANSWER: a

169. According to Weber's ideas on bureaucracy, organizations should be based on _____.

- a. personal loyalty
- b. personal references
- c. rational authority
- d. family ties
- e. charismatic authority

ANSWER: c

170. Whereas scientific management focused on individual productivity, the administrative principles approach focused on _____.

- a. the total organization
- b. individual effort
- c. management by principle
- d. employee loyalty
- e. the work flow through the organization

ANSWER: a

171. Amos' Antiques, Inc., is characterized by separation of management from ownership and by clearly defined lines of authority and responsibility. These characteristics are consistent with the principles of _____.

- a. scientific management
- b. bureaucratic organizations
- c. administrative management theory
- d. human resource management
- e. the humanistic perspective

ANSWER: b

172. All of the following are characteristics of Weberian bureaucracy except _____.

- a. labor is divided with clear definitions of authority and responsibility that are legitimized as official duties
- b. positions are organized in a hierarchy of authority, with each position under the authority of a higher one
- c. all personnel are selected and promoted based on technical qualifications
- d. administrative acts and decisions are recorded in writing
- e. management is the same as the ownership of the organization

ANSWER: e

173. Max Weber felt that selection of employees should be based on _____.

- a. education
- b. competence
- c. connections
- d. political skills
- e. efficient systems

ANSWER: b

Ch 01: Leading Edge Management

174. Which of the following uses mathematics, statistical techniques, and computer technology to facilitate management decision making, particularly for complex problems?

- a. Quants
- b. Management science
- c. Scientific management
- d. Administrative principles approach
- e. Bureaucratic organizations approach

ANSWER: b

175. Positions organized in a hierarchy of authority is an important characteristic of _____.

- a. scientific management
- b. bureaucratic organizations
- c. quantitative management
- d. the human relations movement
- e. total quality management

ANSWER: b

176. UPS is successful in the small package delivery market. One important reason for this success is the concept of _____.

- a. globalization
- b. employee flexibility
- c. loose standards
- d. bureaucracy
- e. nonbureaucratic organizational system

ANSWER: d

177. The principle that similar activities in an organization should be grouped together under one manager is the essence of the classical perspective known as _____.

- a. unity of command
- b. division of work
- c. unity of direction
- d. scalar chain
- e. quality management

ANSWER: c

178. The use of specialization to produce more and better work with the same level of effort is consistent with the administrative management principle of _____.

- a. unity of command
- b. unity of direction
- c. scalar chain
- d. division of work
- e. quality management

ANSWER: d

Ch 01: Leading Edge Management

179. Genex Dynamics is a ballistics company that uses the unity of command, scalar chain, and division of work principles. These are part of which management philosophy?

- a. Administrative principles approach
- b. Bureaucratic approach
- c. Scientific management approach
- d. Humanistic approach
- e. Behavioral sciences approach

ANSWER: a

180. Which of the following refers to a chain of authority extending from the top to the bottom of the organization and including every employee?

- a. Unity of command
- b. Division of labor
- c. Unity of direction
- d. Scalar chain
- e. Quality management

ANSWER: d

181. Which of the following is reflected in management information systems designed to provide relevant information to managers in a timely and cost-efficient manner?

- a. Operations research
- b. Operations management
- c. Information technology
- d. Systems thinking
- e. Infrastructure development

ANSWER: c

182. Matrix Dress Designs operates using the concept of empowerment, where employees act independently and with management facilitating rather than controlling workers. These qualities represent which of the following management approaches?

- a. Administrative principles approach
- b. Bureaucratic approach
- c. Scientific management approach
- d. Humanistic perspective
- e. Behavioral sciences approach

ANSWER: d

183. Mary Parker Follett contributed to which of the following fields?

- a. Humanistic approach
- b. Scientific management approach
- c. Total quality management approach
- d. Quantitative approach to management
- e. Systems approach to management

ANSWER: a

Ch 01: Leading Edge Management

184. Rather than engineering techniques, Mary Parker Follett thought of leadership as _____.

- a. systems
- b. top managers
- c. people
- d. efficiencies
- e. floor managers

ANSWER: c

185. Which of the following was a key finding in the Hawthorne studies?

- a. Stronger lighting increased productivity.
- b. More money resulted in increased productivity.
- c. Productivity declined in all experiments.
- d. Higher temperatures reduced productivity.
- e. Human relations increased productivity.

ANSWER: e

186. Chester Barnard felt that which of the following could help a poorly managed organization?

- a. Bureaucracy
- b. Line managers
- c. Efficiencies
- d. Informal relationships
- e. Top/down flow of information

ANSWER: d

187. Despite flawed methodology or inaccurate conclusions, the Hawthorne studies provided the impetus for _____.

- a. the classical perspective
- b. the humanistic perspective
- c. scientific management
- d. the bureaucratic organizations approach
- e. the contingency perspective

ANSWER: b

188. A clique within an organization is part of the _____.

- a. formal organizational structure
- b. informal organization
- c. scalar chain
- d. reorganization process
- e. top management level

ANSWER: b

189. A significant contribution of Chester Barnard was the concept of _____.

- a. bureaucracy
- b. the informal organization

Ch 01: Leading Edge Management

- c. total quality management
- d. scientific management
- e. traditional theory of authority

ANSWER: b

190. The human resources perspective of management links motivation theories with _____.

- a. top management
- b. design of job tasks
- c. floor managers
- d. efficiencies
- e. profit maximization

ANSWER: b

191. A "dairy farm" view of management in which contented cows give more milk so satisfied workers will give more work was espoused by the _____.

- a. human relations movement
- b. human resources perspective
- c. behavioral sciences approach
- d. management science perspective
- e. administrative principles approach

ANSWER: a

192. Maslow's hierarchy of needs started with which of the following needs?

- a. Esteem
- b. Love
- c. Safety
- d. Physiological
- e. Belongingness

ANSWER: d

193. Benjamin believes his employees are responsible, creative, and able to work with minimal direction. He is a _____.

- a. Theory X manager
- b. Theory Y manager
- c. Theory Z manager
- d. Theory A manager
- e. contingency theory manager

ANSWER: b

194. Theory X and Theory Y were developed by _____.

- a. Douglas McGregor
- b. Henry Gantt
- c. Max Weber
- d. Mary Parker Follett

Ch 01: Leading Edge Management

- e. Frank Gilbreth

ANSWER: a

195. Briana Brant, production supervisor at Trustworthy Tools Mfg., Inc., believes that her employees dislike work, avoid responsibility, and therefore need to be controlled and directed. Briana is a _____.

- a. Theory X manager
- b. Theory Y manager
- c. realistic manager
- d. Theory Z manager
- e. Theory J manager

ANSWER: a

196. According to Douglas McGregor, the classical perspective on management is consistent with which of the following?

- a. Theory X manager
- b. Theory Y manager
- c. Theory Z manager
- d. Theory A manager
- e. All of these choices

ANSWER: a

197. The behavioral sciences approach is based on which of the following disciplines?

- a. Anthropology
- b. Economics
- c. Sociology
- d. Psychology
- e. All of these choices

ANSWER: e

198. Organization development is one specific set of management techniques based in which of the following approaches?

- a. Management science approach
- b. Systems theory approach
- c. Behavioral sciences approach
- d. Scientific management approach
- e. Quantitative approach

ANSWER: c

199. Forestville Freeze is regionally known for its employee training programs. Managers at the Freeze conduct research to determine the best candidate interviewing techniques. This involves the use of which management approach?

- a. Administrative principles approach
- b. Bureaucratic approach
- c. Behavioral sciences approach
- d. Humanistic approach
- e. Scientific management approach

ANSWER: c

Ch 01: Leading Edge Management

200. Which of the following stresses the satisfaction of employees' basic needs as the key to increased worker productivity?

- a. Scientific management perspective
- b. Classical perspective
- c. Management science perspective
- d. Behavioral sciences approach
- e. Human relations movement

ANSWER: e

201. Which of the following emphasized the importance of understanding human behaviors, needs, and attitudes in the workplace as well as social interactions and group processes?

- a. Humanistic perspective
- b. Classical perspective
- c. Scientific management
- d. Bureaucratic organizations
- e. Contingency perspective

ANSWER: a

202. Most early interpretations of the Hawthorne studies argued that the factor that best explained increased output was _____.

- a. money
- b. days off
- c. human relations
- d. lighting
- e. free food

ANSWER: c

203. Which of the following terms refers to technologies, skills, and processes for searching and examining massive, complex sets of data to uncover hidden patterns and correlations?

- a. Total quality management
- b. Quantitative techniques
- c. Big data analytics
- d. Supply chain management
- e. Reengineering

ANSWER: c

204. Which of the following statements regarding management tools is true?

- a. In 1993, the top management tool was mission and vision statements, whereas in 2017, the top management tool was strategic planning.
- b. In 1993, the top management tool was strategic planning, whereas in 2017, the top management tool was mission and vision statements.
- c. In 1993, the top management tool was customer relationship management, whereas in 2017, the top management tool was customer satisfaction.
- d. In 1993, the top management tool was customer satisfaction, whereas in 2017, the top management tool was

Ch 01: Leading Edge Management

customer relationship management.

e. In 1993 and 2017, the top management tool was strategic planning.

ANSWER: a

205. In which region are managers adopting new tools faster than managers in other regions?

- a. North America
- b. South America
- c. Asia-Pacific
- d. Europe
- e. Middle East

ANSWER: c

206. Aneth has just installed a "smart" home system. One of the features in her home include her keyless door lock sending a text message when it is activated. This is an example of _____.

- a. big data analytics
- b. a platform-based organization
- c. information technology
- d. the classical perspective
- e. the Internet of Things

ANSWER: c

207. What type of organization connects and enables users to both create and consume something of value?

- a. Connection-based organization
- b. Supply chain organization
- c. Intermediary-based organization
- d. Platform-based organization
- e. Association-based organization

ANSWER: d

208. Which of the following means the hierarchical reporting relationship between the manager and the subordinate is almost completely eliminated and employees have full authority to make key decisions about their work?

- a. Incremental decentralization
- b. Employee decentralization
- c. Radical decentralization
- d. Radical centralization
- e. Incremental centralization

ANSWER: c

209. Which of the following statements regarding Millennial and Gen Z employees is true?

- a. They are hesitant to question their superiors.
- b. They want to work in an individualized work environment.
- c. They want the power to make substantive decisions in the workplace.
- d. They want work that is easy.
- e. They are hesitant to challenge the status quo.

Ch 01: Leading Edge Management

ANSWER: c

210. If an employee is engaged, which of the following is most likely to happen?

- a. They will contribute enthusiastically to meeting team and organizational goals.
- b. They will be emotionally unattached to their jobs.
- c. They will struggle to find a sense of belonging to the organization and its mission.
- d. They will be likely to seek other job opportunities.
- e. They will be dissatisfied with their work conditions.

ANSWER: a

211. Which of the following is contributing to technology (*thing* of production) possibly adding directly to the humanity of production by doing the work that humans find unsatisfying?

- a. Artificial intelligence
- b. Classical perspective
- c. Information technology
- d. Nudge management
- e. Big data analytics

ANSWER: a

212. Which of the following uses artificial intelligence to support managers?

- a. Humanistic perspective
- b. Classical perspective
- c. Information technology
- d. Nudge management
- e. Big data analytics

ANSWER: d

213. Management that applies insights from the behavioral sciences to design elements of the organization in a way that guides people toward behaviors that support organizational goals and values is known as ____.

- a. radical decentralization
- b. classical management
- c. information technology
- d. nudge management
- e. big data analytics

ANSWER: d

214. Which of the following is having a big impact on routine administrative processes in organizations, including spreadsheets, checking customer records and employee expense accounts, and making payments?

- a. Radical decentralization
- b. Humanistic perspective
- c. Artificial intelligence
- d. Employee engagement
- e. Big data analytics

ANSWER: c

Ch 01: Leading Edge Management

Subjective Short Answer

Scenario - Caleb Miller

The promotion to first-line manager took place just six weeks ago for Caleb Miller. He was well qualified for the promotion, but the new job still required a lot of training. One of the challenges has been to coordinate the production of his team with the needs of the sales department and with the availability of raw materials from his suppliers. Setting priorities and developing schedules to accomplish the work is a part of Caleb's job that he has really enjoyed. The challenges to maintain high rapport and to build a strong team with his employees have already brought him a lot of satisfaction. In reflecting on the last six weeks, Caleb concludes that he is very happy about his new job.

215. In his job, Caleb needs to do all of the following except _____.

- a. plan
- b. organize
- c. lead
- d. control
- e. hire

ANSWER: e

216. The managerial skill that is least important at Caleb's middle-level management position is _____.

- a. conceptual
- b. human
- c. technical
- d. marketing

ANSWER: c

217. By maintaining information links, Caleb Miller was exhibiting the interpersonal role of _____.

- a. figurehead
- b. leader
- c. liaison
- d. monitor
- e. spokesperson

ANSWER: c

218. With setting priorities and setting schedules, Caleb was participating in the decisional role of _____.

- a. entrepreneur
- b. disturbance handler
- c. disseminator
- d. resource allocator
- e. monitor

ANSWER: d

Scenario - Brittney Marr

The opportunity to gain a foothold in the snack cracker industry had just been found. Brittney Marr, an account executive manager for Baked Wheat Industries had developed an interest in wheat crackers two months ago when one of her newly hired account execs, Hunter Bender, had told her about the high margins and promising future associated with that market. Marr had always believed that if you do your homework in hiring the best people then it only makes sense to listen to their recommendations and implement their suggestions.

Ch 01: Leading Edge Management

Marr had given her approval to Bender to explore opportunities to move into this promising new market. This morning, Bender reported that Jackson Corporation had severed its contract with Feel Good Crackers Incorporated. Apparently, the Feel Good salesman had shared sensitive information about Jackson at a cocktail party. Bender had already established a good relationship with Feel Good buyers and so recognized this as an opportunity to expand his market into wheat crackers.

219. Marr's behavior provides an example of _____.

- a. the use of scalar rope
- b. division of organization
- c. the principle of inversion
- d. unity of direction
- e. All of these choices

ANSWER: d

220. Marr's management style reflects a belief in _____.

- a. Theory Y
- b. developing her employees through control
- c. the classical perspective
- d. Theory X
- e. utilizing technical skills

ANSWER: a

Essay

221. Identify the four functions of management.

ANSWER: Planning, organizing, leading, and controlling

222. List the three management skills necessary to perform effectively in organizations.

ANSWER: Conceptual, human, and technical skills

223. List five of Mintzberg's managerial roles.

ANSWER: Mintzberg's managerial roles include monitor, spokesperson, disseminator, figurehead, leader, liaison, entrepreneur, disturbance handler, resource allocator, and negotiator.

224. List three of the basic ideas of scientific management.

ANSWER: Any three of the following develop standard methods for doing each job; select workers with appropriate abilities; train workers in standard methods; support workers and eliminate interruptions; and provide wage incentives.

225. List the three assumptions associated with McGregor's Theory X.

ANSWER: (1) Individuals have an innate dislike of work and will try to avoid it; (2) Most people must be coerced to get them to put out a reasonable level of effort; and (3) The typical person prefers to be told what to do.

226. Define management and describe two important ideas expressed in the definition.

ANSWER: Management is defined as the attainment of organizational goals in an effective and efficient manner through the planning, organizing, leading, and controlling of organizational resources. The two important ideas expressed include the four functions of management and the attainment of organizational goals in an effective and efficient manner.

Ch 01: Leading Edge Management

227. Describe the four management functions.

ANSWER: Planning means defining goals for future performance and determining how to attain them. Organizing involves assigning tasks, grouping tasks into departments, and allocating resources across the organization. Leading is the use of influence to motivate employees to attain organizational goals. Controlling means monitoring employees' activities, keeping the organization on track toward meeting its goals, and making corrections as necessary.

228. Describe the skills necessary for performing a manager's job.

ANSWER: The skills are conceptual, human, and technical. Conceptual skills include the cognitive ability to see the organization as a whole system and the relationships among its parts. Human skills refer to a manager's ability to work with and through other people and to work effectively as part of a group. Technical skills include the understanding of and proficiency in the performance of specific tasks.

229. Why are conceptual skills most important for top managers?

ANSWER: Top managers are often the keys to holding the whole company together. Many of the responsibilities of top managers—such as decision making, resource allocation, and innovation—require a broad view.

230. Briefly discuss the relationship between management skills and management level.

ANSWER: Conceptual and human skills become more important as a manager moves up through the organization, and technical skills become less important as a manager moves up through the organization.

231. What are technical skills? At what level are they most important and why?

ANSWER: Technical skill is the understanding of and proficiency in the performance of specific tasks. Technical skills are particularly important at lower organizational levels, but they become less important than human and conceptual skills as managers move up the hierarchy.

232. Describe the three categories of managerial roles.

ANSWER: The three categories of managerial roles are informational, interpersonal, and decisional. Informational roles describe the activities used to maintain and develop an information network. Interpersonal roles pertain to relationships with others and are related to human skills. Decisional skills relate to those events about which the manager must make a choice and take action.

233. Discuss the advantages and disadvantages of Taylor's scientific management.

ANSWER: The advantages of scientific management include the standardization of work, the systematic study of work, the linking of performance and pay, and improved productivity. The disadvantages include its failure to consider the social context within which work takes place and its failure to appreciate workers' needs, other than their need for money.

234. The writings of Fayol, Taylor, and Weber provide the foundation for modern management. Identify the school of thought associated with each writer and compare the focus that each writer takes in relation to the organization.

ANSWER: Fayol is associated with the administrative principles approach and focused on the manager level. Taylor is associated with scientific management and focused on the work level. Weber is associated with the bureaucratic organizations approach, and his focus was on the level of the organization.

235. Briefly describe what happened in the Hawthorne studies and explain the results and conclusions of these studies.

ANSWER: Harvard researchers, working under the direction of Elton Mayo, were studying the effects of various lighting conditions on worker performance at the Western Electric Company plant in Hawthorne, Illinois. Each time an experimental change was made, performance improved, regardless of the change. The early conclusion was that workers perceived that their work was important enough to hire researchers to work with them, and this

Ch 01: Leading Edge Management

recognition of importance was sufficient to motivate improved performance. This conclusion led to the development of the human relations movement, which stressed the importance of satisfied, happy workers. Recent analysis suggests that money may have been the single most important motivating factor.

236. Describe the assumptions behind McGregor's Theory X and Theory Y. How do these theories relate to the classical perspective on management and early human relations ideas?

ANSWER: Douglas McGregor became frustrated with the early, simplistic human relations notions. He challenged both the classical perspective and the early human relations assumptions about human behavior. McGregor believed that the classical perspective was based on Theory X assumptions about workers. He also felt that a slightly modified version of Theory X fit early human relations ideas. He proposed Theory Y as a more realistic view of workers for guiding management thinking.

237. Artificial intelligence (AI) has become a state-of-the-art business leadership tool. Identify some tasks that could be done using AI software.

ANSWER: AI software is automating mundane office tasks in operations such as accounting, billing, payments, and customer service. AI programs can scan documents, check the accuracy of customer records, enter numbers into spreadsheets, and make payments.

238. The process of management in the workplace is changing. In the past, a manager's task was to achieve organizational goals by maintaining tight control over their employees while standardizing procedures to maintain stability. Today's managers are asked to empower employees while encouraging collaboration and innovation. Contrast today's workforce with the workforce of the past. What developments in present society necessitate a shift in management style? Can you foresee other management style changes on the horizon?

ANSWER: Student answers will vary. People in today's society want to feel like they are making a valuable contribution in the workplace; they are much less likely to relinquish "control" to their manager. They often demand more flexibility and creativity in their work situation because their lives are fast paced, unpredictable, and increasingly mobile. Today's managers have to accomplish more with fewer resources. They recognize the value of being an enabler rather than a controller, using an empowering leadership style, and enlisting the cooperation of willing workers who are part of a team. Improved communication techniques, use of social media, and the increase in off-site workers will surely force even more changes related to management style in the future.

239. Effective managers must possess technical skills, human skills, and conceptual skills in varying degrees. After defining each term, justify your assessment of which of the three skills you deem to be most important to a successful manager.

ANSWER: Student answers will vary. Technical – understands and is proficient in the performance of tasks (knowledge and use of tools and techniques, as well as troubleshooting and problem solving). Human – can work with and work through other people, both individually and as a group (motivate, communicate, coordinate, lead, resolve conflict). Conceptual – can think strategically and see one's team as part of a bigger system (a company, an industry, a community, a society). Failed management is overwhelmingly attributed to lack of human skills, e.g., poor communication with employees and/or customers and lack of relationship building with the team.

240. Small businesses and nonprofit organizations require good management to achieve their goals. But the efforts and activities of each are directed toward a different "bottom line." Describe a managerial position at a nonprofit where you would like to work, and discuss how the requirements differ from a managerial position in a large, for-profit organization. Incorporate the concepts you have learned about the manager's role in small businesses and nonprofit organizations.

ANSWER: Student answers will vary. Managers in both arenas must adjust various management functions and roles to fit their unique work environment. Managers in small businesses often act as the face of the company, spokesperson, and entrepreneur who must be innovative and help their company thrive and be competitive. Their efforts and activities are directed toward improving products and services, increasing sales, and earning

Ch 01: Leading Edge Management

money for the company. Managers in nonprofit organizations also act as the public face of their nonprofit, the spokesperson who solicits government and donor funding, the leader who builds a community of employees and volunteers who are mission-driven, and the resource allocator. Their efforts and activities are directed toward making an impact on society.

241. Companies often pull new managerial candidates from a pool of outstanding individual performers. Contrast the role of the individual performer with that of the manager. Be sure to include a description of how both roles might use the ABC's of prioritizing tasks or activities, a classic time management technique.

ANSWER: Student answers will vary. An individual performer is a specialist who thinks in terms of performing specific activities expertly, as well as spending time and energy to perfect his current skill and master new ones. He generally accomplishes tasks through his own efforts, rather than relying on others. A manager must learn to think differently about himself and his personal identity. He must become a generalist who coordinates a range of activities and helps others develop their potential. Rather than accomplishing the task himself, a manager delegates to others, working with and through them. New managers and employees alike often struggle with managing a large workload and can benefit from implementing classic time management techniques. The ABC's of prioritizing tasks or activities include the following: A—highly important, must be done, serious consequences; B—should be done, minor consequences; C—nice to get done, but optional with no consequences; D—delegate this task to someone else.

242. The classical perspective emphasizes managing with a rational, scientific approach. The humanistic perspective emphasizes understanding the behavior, needs, and attitudes of those involved in the work process. Isolate two main characteristics of each approach and combine them to form your own hybrid management perspective.

ANSWER: Classical perspective main characteristics: 1. Scientific management that seeks to improve productivity by employing standardized methods for doing each job and selecting and training appropriate workers; gives wage incentives; well-illustrated by assembly-line production. 2. Bureaucratic approach is impersonal with clearly defined roles of authority and responsibility and strict record keeping; often seen as a threat to personal liberty. 3. Administrative principles approach focuses on increasing productivity of entire organization as opposed to productivity of individual worker. 4. Management science uses mathematics, statistical techniques, and computer technology to facilitate management decision making, particularly for complex problems.

Humanistic perspective main characteristics: 1. Human relations movement seeks to satisfy employee needs in order to increase production. 2. Human resources approach allows employees to use their full potential. 3. Behavioral sciences approach uses disciplines such as psychology and sociology to assess human interactions in the workplace. 4. Worker empowerment, participation, and cooperation, not control of workers.

243. Management science (or the quantitative perspective) uses mathematics, statistics, and computer technology for complex problem solving, decision making, and record keeping. Define the three subsets of management science, and evaluate the usefulness of this management technique in today's workplace, including at least one advantage and one disadvantage.

ANSWER: Three subsets are operations research (mathematical model building and application), operations management (specifically used to solve manufacturing and production issues), and information technology (information relay throughout the organization). Management science has become critical to the efficient management of large companies and business systems. But managers cannot rely exclusively on numbers and algorithms because they do not take the human factor into consideration.

244. The bossless workplace is one modern management technique that strives to meet new management challenges and address the needs of employees, customers, and the environment. There is no hierarchy in a bossless workplace, and all workers are created equal. What additional management technique must be practiced in order to facilitate a bossless workplace? In your judgment, is going "bossless" a realistic approach to today's workplace?

ANSWER: The bossless workplace must have employees who are emotionally involved in their jobs and satisfied with

Ch 01: Leading Edge Management

working conditions (employee engagement). Companies must train employees to work effectively within a nonhierarchical system. All workplaces do not lend themselves to the bossless concept, but all workplaces benefit from applying employment engagement techniques to some degree. Companies can create an atmosphere where employees feel a commitment to the company goal and mission. They can communicate honestly with employees and provide opportunities for career advancement as well as community service. Today's educated, mobile workers want a flexible, collaborative work environment that uses cutting-edge technologies, and where they can have a part in decision making. As such, many workers will seek out a company that leans toward being bossless.
