CHAPTER 2

A Further Look at the Balance Sheet

Learning Objectives

1. Identify the sections of a classified balance sheet.
2. Use ratios to evaluate a company's balance sheet.

ANSWERS TO QUESTIONS

1. A company's operating cycle is the average time that is required to go from cash to cash in producing revenue.

LO 1 BT: K Diff: E TOT: 1 min. AACSB: None AICPA FC: Measurement

2. Current assets are assets that a company expects to convert to cash or use up within one year of the balance sheet date or the company's operating cycle, whichever is longer. Current assets are listed in the order in which they are expected to be converted into cash.

LO 1 BT: K Diff: E TOT: 1 min. AACSB: None AICPA FC: Reporting

3. Long-term investments are investments in stocks and bonds of other corporations that are held for more than one year, and long-term assets such as land or buildings that a company is not currently using in its operating activities. Property, plant, and equipment are assets with relatively long useful lives that are currently used in operating the business.

LO 1 BT: C Diff: M TOT: 2 min. AACSB: None AICPA FC: Reporting

4. Current liabilities are obligations that will be paid within the coming year or operating cycle, whichever is longer. Long-term liabilities are obligations that will be paid after one year.

LO 1 BT: C Diff: M TOT: 1 min. AACSB: None AICPA FC: Reporting

5. The two parts of stockholders' equity and the purpose of each are: (1) **Common stock** is used to record investments of assets in the business by the owners (stockholders). (2) **Retained earnings** is used to record net income retained in the business.

LO 1 BT: K Diff: M TOT: 2 min. AACSB: None AICPA FC: Reporting

6. Intangible assets include goodwill, patents, trademarks, tradenames, and copyrights.

LO 1 BT: K Diff: M TOT: 2 min. AACSB: None AICPA FC: Reporting

7. (a) Geena is not correct. There are three characteristics: liquidity, profitability, and solvency.
(b) The three parties are not primarily interested in the same characteristics of a company. Short-term creditors are primarily interested in the liquidity of the company. In contrast, long-term creditors and stockholders are primarily interested in the profitability and solvency of the company.

LO 2 BT: C Diff: M TOT: 3 min. AACSB: None AICPA FC: Reporting

8. (a) Liquidity ratios: Working capital and current ratio.
(b) Solvency ratio: Debt to assets.

LO 2 BT: K Diff: E TOT: 2 min. AACSB: None AICPA FC: Reporting

Questions Chapter 2 (Continued)

9. Debt financing is riskier than equity financing because debt must be repaid at specific points in time, whether the company is performing well or not. Thus, the higher the percentage of assets financed by debt, the riskier the company.

LO 2 BT: C Diff: E TOT: 2 min. AACSB: None AICPA FC: Reporting

10. (a) Liquidity ratios measure the short-term ability of the company to pay its maturing obligations and to meet unexpected needs for cash.
- (b) Profitability ratios measure the income or operating success of a company for a given period of time.
- (c) Solvency ratios measure the company's ability to survive over a long period of time.

LO 2 BT: K Diff: E TOT: 2 min. AACSB: None AICPA FC: Reporting

11. (a) An increase in the current ratio signals good news because the company improved its ability to meet maturing short-term obligations.
- (b) The increase in the debt to assets ratio is bad news because it means that the company has increased its obligations to creditors and has lowered its equity "buffer."

LO 2 BT: AN Diff: M TOT: 3 min. AACSB: Analytic AICPA FC: Reporting

12. At September 26, 2020 Apple's largest current asset was Marketable securities of \$52,927 million, its largest current liability is Other current liabilities of \$42,684 million and its largest item under "Assets" was Marketable securities under Non-current assets of \$100,887 million.

LO 1 BT: AN Diff: M TOT: 5 min. AACSB: Analytic AICPA FC: Reporting

BRIEF EXERCISE 2.6

Working capital = Current assets – Current liabilities

Current assets	\$ 102.5 million
Current liabilities	<u>(201.2) million</u>
Working capital	<u>(\$ 98.7) million</u>
(Current assets – Current liab.)	

Current ratio:

$$\frac{\text{Current assets}}{\text{Current liabilities}} = \frac{\$102,500,000}{\$201,200,000}$$

$$= 0.51:1$$

(Current assets ÷ Current liab.)

LO 2 BT: AP Difficulty: Easy TOT: 3 min. AACSB: Analytic AICPA ACC: Reporting

BRIEF EXERCISE 2.7

(a) **Current ratio**

$$\frac{\text{Current assets}}{\text{Current liabilities}} = \frac{\$262,787}{\$293,625} = 0.89:1$$

(Current assets ÷ Current liab.)

(b) **Debt to assets ratio**

$$\frac{\text{Total liabilities}}{\text{Total assets}} = \frac{\$376,002}{\$439,832} = 85.5\%$$

(Tot. liab. ÷ Tot. assets)

LO 2 BT: AP Difficulty: Easy TOT: 3 min. AACSB: Analytic AICPA FC: Reporting

SOLUTIONS TO DO IT! EXERCISES

DO IT! 2.1a

MYLAR CORPORATION Balance Sheet (partial) December 31, 2027

Assets		
Current assets		
Cash	\$ 13,000	
Accounts receivable.....	22,000	
Inventory	58,000	
Supplies	<u>7,000</u>	
Total current assets		\$100,000
Property, plant, and equipment		
Equipment.....	180,000	
Less: Accumulated depreciation— equipment	<u>50,000</u>	<u>130,000</u>
Total assets.....		<u>\$230,000</u>

(Cash + Accts. rec. + Inv. + Sup. + Equip. – Acc. dep.)

LO 1 BT: AP Difficulty: Medium TOT: 5 min. AACSB: Analytic AICPA FC: Reporting

DO IT! 2.1b

<u>IA</u> Trademarks	<u>CA</u> Inventory
<u>CL</u> Notes payable (current)	<u>PPE</u> Accumulated depreciation
<u>NA</u> Interest revenue	<u>PPE</u> Land
<u>CL</u> Income taxes payable	<u>SE</u> Common stock
<u>LTI</u> Debt investments (long-term)	<u>NA</u> Advertising expense
<u>CL</u> Unearned sales revenue	<u>LTL</u> Mortgage payable (due in 3 years)

LO 1 BT: K Difficulty: Easy TOT: 3 min. AACSB: Analytic AICPA FC: Reporting

DO IT! 2.2

(a)	Current assets:	2027	\$6,700 (1,700 + 900 + 3,700 + 400)
		2026	\$8,500 (2,400 + 1,200 + 4,200 + 700)
	Current liabilities:	2027	\$6,100 (3,900 + 2,200)
		2026	\$4,600 (3,000 + 1,600)

(b)	Working capital	2027	\$6,700 – \$6,100 = \$600
		2026	\$8,500 – \$4,600 = \$3,900

	Current ratio	2027	\$6,700 ÷ \$6,100 = 1.10:1
		2026	\$8,500 ÷ \$4,600 = 1.85:1

(c)	Debt to assets ratio	2027	\$42,100 ÷ \$72,700 = 57.91%
		2026	\$34,600 ÷ \$80,500 = 42.98%

- (d) The company's working capital and current ratio decreased. This suggests that its ability to pay its short-term obligations declined. The company's debt to assets ratio increased. This suggests that its ability to pay interest and principal on its debts as they come due has declined.

LO 2 BT: AN Difficulty: Medium TOT: 10 min. AACSB: Analytic AICPA FC: Reporting

EXERCISE 2.11

(a)	<u>Beginning of Year</u>	<u>End of Year</u>
Working capital	$\$3,361 - \$1,635 = \$1,726$	$\$3,217 - \$1,601 = \$1,616$
Current ratio	$\frac{\$3,361}{\$1,635} = 2.06:1$	$\frac{\$3,217}{\$1,601} = 2.01:1$

(Current assets – Current liab.) and (Current assets ÷ Current liab.)

- (b) Nordstrom's liquidity decreased slightly during the year. Its current ratio decreased from 2.06:1 to 2.01:1. Also, Nordstrom's working capital decreased by \$110 million.
- (c) Nordstrom's current ratio at both the beginning and the end of the recent year exceeds Best Buy's current ratio for 2020 (and 2019). Nordstrom's end-of-year current ratio (2.01) exceeds Best Buy's 2020 current ratio (1.10*). Nordstrom would be considered much more liquid than Best Buy for the recent year.

***Per Illustration 2.6**

LO 2 BT: AP Difficulty: Medium TOT: 10 min. Difficulty: Analytic AICPA FC: Reporting

EXERCISE 2.12

$$(a) \text{ Current ratio} = \frac{\$60,000}{\$30,000} = 2.0 : 1$$

(Current assets ÷ Current liabilities)

$$\text{Working capital} = \$60,000 - \$30,000 = \$30,000$$

(Current assets – Current liabilities)

$$(b) \text{ Current ratio} = \frac{\$40,000^*}{\$10,000^{**}} = 4.0 : 1$$

(Current assets ÷ Current liabilities)

$$\text{Working capital} = \$40,000 - \$10,000 = \$30,000$$

(Current assets – Current liabilities)

$$*\$60,000 - \$20,000$$

$$**\$30,000 - \$20,000$$

- (c) Liquidity measures indicate a company's ability to pay current obligations as they become due. Satisfaction of current obligations usually requires the use of current assets.

If a company has more current assets than current liabilities, it is more likely that it will meet obligations as they become due. Since working capital and the current ratio compare current assets to current liabilities, both are measures of liquidity.

Payment of current obligations frequently requires cash. Neither working capital nor the current ratio indicate the composition of current assets. If a company's current assets are largely comprised of items such as inventory and prepaid expenses, it may have difficulty paying current obligations even though its working capital and current ratio are large enough to indicate favorable liquidity. In Myeneke's case, payment of \$20,000 of accounts payable will leave only \$5,000 cash. Since salaries payable will require \$10,000, the company may need to borrow in order to make the required payment for salaries and wages.

- (d) The CFO's decision to use \$20,000 of cash to pay off accounts payable is not in itself unethical. However, doing so just to improve the year-end current ratio could be considered unethical if this action misled creditors. Since the CFO requested preparation of a "preliminary" balance sheet before deciding to pay off the liabilities he seems to be "managing" the company's financial position, which is usually considered unethical.

PROBLEM 2.5

(a) (i) **Working capital = \$458,900 – \$195,500 = \$263,400.**

(Current assets – Current liab.)

(ii) **Current ratio = $\frac{\$458,900}{\$195,500} = 2.35:1$.**

(Current assets ÷ Current liab.)

(iii) **Debt to assets ratio = $\frac{\$395,500}{\$1,034,200} = 38.2\%$.**

(Tot. liab. ÷ Tot. assets)

(b) **During 2027, the company's current ratio increased from 1.65:1 to 2.35:1 and its working capital increased from \$160,500 to \$263,400. Both measures indicate an improvement in liquidity during 2027.**

The company's debt to assets ratio increased from 31.0% in 2026 to 38.2% in 2027 indicating that the company is less solvent in 2027.

LO 2 BT: AP Difficulty: Medium TOT: 15 min. AACSB: Analytic AICPA FC: Reporting

PROBLEM 2.6

2026

2027

(a) Working capital.

$$(\$20,000 + \$62,000 + \$73,000) - \$70,000 = \$85,000$$

(Current assets – Current liab.)

$$(\$28,000 + \$70,000 + \$90,000) - \$75,000 = \$113,000$$

(b) Current ratio.

$$\frac{\$155,000}{\$70,000} = 2.2:1$$

(Current assets ÷ Current liab.)

$$\frac{\$188,000}{\$75,000} = 2.5:1$$

(c) Debt to assets ratio.

$$\frac{\$160,000}{\$685,000} = 23.4\%$$

(Tot. liab. ÷ Tot. assets)

$$\frac{\$155,000}{\$760,000} = 20.4\%$$

(d) The liquidity of the corporation as shown by the working capital and the current ratio has improved slightly. Also, the corporation improved its solvency by improving its debt to assets ratio.

LO 2 BT: AP Difficulty: Medium TOT: 20 min. AACSB: Analytic AICPA FC: Reporting

PROBLEM 2.7

Ratio	Target	Walmart
	(All Dollars are in Millions)	
(a) Working capital	$\$17,488 - \$10,512 = \$6,976$	$\$48,949 - \$55,390 = (\$6,441)$
	(Current assets – Current liab.)	
(b) Current ratio	1.66:1 ($\$17,488 \div \$10,512$)	0.88:1 ($\$48,949 \div \$55,390$)
	(Current assets ÷ Current liab.)	
(c) Debt to assets ratio	68.9% ($\$30,394 \div \$44,106$)	60% ($\$98,144 \div \$163,429$)
	(Tot. liab. ÷ Tot. assets)	

(d) The comparison of the two companies shows the following:

Liquidity—Target’s current ratio of 1.66:1 is much better than Walmart’s 0.88:1 and Target has significantly higher working capital than Walmart.

Solvency—Walmart’s debt to assets ratio is lower than Target’s, indicating that Walmart is more solvent than Target.

LO 2 BT: AP Difficulty: Medium TOT: 20 min. AACSB: Analytic AICPA FC: Reporting

- (a) Total current assets were \$143,713 million at September 26, 2020, and \$162,819 million at September 28, 2019.
- (b) Current assets are properly listed in the order of liquidity. As you will learn in a later chapter, inventories are considered to be less liquid than receivables. Thus, they are listed below receivables and before prepaid expenses.
- (c) The asset classifications are similar to the text: (a) current assets, (b) long-term marketable securities, (c) property, plant, and equipment, and (d) other non-current assets.
- (d) Total current liabilities were \$105,392 million at September 26, 2020, and \$105,718 million at September 28, 2019.

LO 1 BT: AP Difficulty: Medium TOT: 8 min. AACSB: Analytic AICPA FC: Reporting

(a)	(\$ in thousands)	Columbia Sportswear	Under Armour
1. Working capital		$\$1,855,621 - \$552,622 = \$1,302,999$ (Current assets – Current liab.)	$\$3,222,975 - \$1,413,276 =$ $\$1,809,699$
2. Current ratio		$\$1,855,621 \div \$552,622 = 3.36:1$ (Current assets $\div$ Current liab.)	$\$3,222,975 \div \$1,413,276 = 2.28:1$
3. Debt to assets ratio		$\$1,003,800 \div \$2,836,571 = 35.4\%$ (Tot. liab. $\div$ Tot. assets)	$\$3,354,635 \div \$5,030,628 = 66.7\%$

(b) Liquidity

Under Armour appears more liquid since it has more working capital than Columbia; however, looking at the current ratios, we see that Columbia's ratio is greater than that of Under Armour.

Solvency

Based on the debt to assets ratio, Columbia is more solvent. Columbia's debt to assets ratio is significantly lower than Under Armour's and, therefore, Columbia would be considered better able to pay its debts as they come due.

LO 2 BT: AN Difficulty: Hard TOT: 10 min. AACSB: Analytic AICPA FC: Reporting

- (a) The percentage decrease in Gap's total assets during this period is calculated as:

$$\frac{\$7,065 - \$8,544}{\$8,544} = (17.3\%)$$

The average decrease per year can be approximated as:

$$\frac{(17.3\%)}{4 \text{ years}} = (4.3\%) \text{ per year}$$

(2027 Total assets – 2023 Total assets) ÷ 2023 Total assets)

- (b) Gap's working capital and current ratio decreased (2024), increased (2025 and 2026) and then decreased (2027) during this period, indicating a decline, an improvement and then another decline in liquidity. The current ratio is a better measure of liquidity because it provides a relative measure; that is, current assets compared to current liabilities. Working capital only tells us the net amount of current assets less current liabilities. It is hard to say whether a given amount of working capital is adequate or inadequate without knowing the size of the company.
- (c) The debt to assets ratio suggests that Gap's solvency didn't change much during the period. Debt to assets was 0.39 in 2023, rose to 0.45 in 2024 and then bounced between 0.39 and 0.42 the next three years.

LO 1, 2 BT: E Difficulty: Hard TOT: 25 min. AACSB: Analytic, Technology AICPA FC: Reporting AICPA BB: Critical Thinking

The current ratio increase is a favorable indication as to liquidity, but alone tells little about the prospects of the client. From this ratio change alone, it is impossible to know the amount and direction of the changes in individual accounts, total current assets, and total current liabilities. Also unknown are the reasons for the changes.

The working capital increase is also a favorable indication as to liquidity, but again the amount and direction of the changes in individual current assets and current liabilities cannot be determined from this measure.

The decrease in the debt to assets ratio is a favorable indicator for solvency and going-concern prospects. The lower the percentage of debt to assets, the lower the risk that a company may be unable to pay its debts as they come due. A decline in the debt to assets ratio is also a positive sign regarding going-concern potential.

The increase in net income is a favorable indicator for both solvency and profitability prospects although much depends on the quality of receivables generated from sales and how quickly they can be converted into cash. A significant factor here may be that despite a decline in sales the client's management has been able to reduce costs to produce this increase. Indirectly, the improved income picture may have a favorable impact on solvency and going-concern potential by enabling the client to borrow currently to meet cash requirements.

Subject: Financial Statement Analysis

(a) Ratios can be classified into three types, which measure three different aspects of a company's financial health:

- 1. Liquidity ratios—These measure a company's ability to pay its current obligations.**
- 2. Solvency ratios—These measure a company's ability to pay its long-term obligations and survive over the long-term.**
- 3. Profitability ratios—These measure the ability of the company to generate a profit.**

(b) 1. Examples of liquidity measures are:

Working capital = Current assets – Current liabilities

Indicates the absolute differences between a company's current assets and its current liabilities.

$$\text{Current ratio} = \frac{\text{Current assets}}{\text{Current liabilities}}$$

Indicates the relative amount of current assets available to cover each dollar of current liabilities.

2. Example of solvency measures are:

$$\text{Debt to assets ratio} = \frac{\text{Total liabilities}}{\text{Total assets}}$$

Measures the percentage of total financing provided by creditors instead of stockholders.

CT2.7 (Continued)

(c) There are three bases for comparing a company's results:

The bases of comparison are:

1. **Intracompany—This basis compares an item or financial relationship within a company in the current year with the same item or relationship in one or more prior years.**
2. **Industry averages—This basis compares an item or financial relationship of a company with industry averages (or norms).**
3. **Intercompany—This basis compares an item or financial relationship of one company with the same item or relationship in one or more competing companies.**
